

Note 1: Please place this unit on a flat surface, during usage. This unit is not meant for sideways use or suspended use. Please note that the load limit is in reference to the the whole load on the unit, which also includes the table top. The load limit does not include impact force. Moving the load by sliding it on the table top, or forcefully shaking the load may cause the unit to malfunction.

Note 2: The hole to affix unit is used to affix unit to surface. It is recommended to devise an access hole on the load to easily remove unit from surface.

Note 3: Note 2: Please make sure the screw to affix the load protrudes less that 10 mm into the rotary unit. If the screw protrudes more than 10mm, it will hinder the unit from rotating.
